

SAW YE HTET

Unity VR Developer · Meta Quest, Hand Tracking & Immersive Training

Singapore · +65 8029 9573 · sawyehtet.dev@gmail.com · www.sawyehtet.com · github.com/sawyehtet-dev

SUMMARY

IT diploma graduate and Unity VR developer based in Singapore, with hands-on experience building immersive training at the Centre of Excellence in Maritime Safety and shipping a Meta Quest title with bare-hand tracking. Comfortable owning the full loop: C# interaction systems, XR input, headset builds, playtesting, and polish, plus solid software fundamentals in Python and TypeScript. Available immediately; requires S Pass sponsorship.

EDUCATION

Singapore Polytechnic

Diploma in Information Technology

Singapore

March 2023 – May 2026

Software development, networking, databases (SQL), and Linux. Delivered full-stack and interactive projects across coursework and team assessments.

EXPERIENCE

Centre of Excellence in Maritime Safety

Unity VR Developer, Research Assistant

Singapore

April 2025 – February 2026

- Primary Unity VR developer for maritime safety research: designed, built, and maintained training scenarios used in live lab sessions on commercial HMDs (~11 months).
- Implemented C# systems for locomotion, grab/interact, and multi-step scenario flow used by researchers and trainees.
- Integrated XR Interaction Toolkit and OpenXR-compatible input so controller and headset behaviour stayed stable on demo days.
- Ran 12 structured playtests; turned feedback into concrete interaction, UX, and scene revisions before the next session.
- Wrote setup guides and known-issue notes so centre staff could reproduce demos without reverse-engineering the project.

TECHNICAL PROJECTS

Maritime Safety VR Training

CEMS · 2025 – 2026

Unity · C# · Meta Interaction SDK · HMD Deploy

- End-to-end immersive training for a maritime research centre: interaction logic, scene assembly, device deployment, and iteration with real users.

Jewelry Shop Robbery - Meta Quest VR

Personal · 2025

Unity · C# · Meta Quest · Hand Tracking

- VR heist game on Meta Quest using hand tracking instead of controllers, with gesture grabs and interact inside a jewelry shop.
- Tuned interaction feel for bare hands: tracking-friendly affordances, scene layout, and Quest-ready Unity builds.

Tokey - Open-Source CLI

2026 · github.com/sawyehtet-dev/tokey

Python · pytest · MIT

- Real-time per-prompt token cost tracker for Claude Code. Public release with 70+ unit tests; small, and fast.

Portfolio & Blog

www.sawyehtet.com

React 19 · TypeScript · Vite

- Personal site for project notes and a public work trail, maintained alongside diploma and VR development.

SKILLS & INTERESTS

VR / 3D: Unity, C#, Meta Quest, hand tracking, XR Interaction Toolkit, OpenXR-style input, HMD build & deploy

Software: Python, TypeScript, JavaScript, SQL, Java, React, Vite, Git, Linux CLI, pytest

Certifications: AI Ethics & Governance (Associate); Microsoft MD-102 Endpoint Administrator (in progress)

Languages: English, Burmese

Work auth.: Requires S Pass sponsorship · Singapore-based · available immediately

Interests: Immersive training, hand-tracked interaction, shipping small tools people actually use
