

SAW YE HTET

Software QA & Testing

Singapore | sawyehtet.dev@gmail.com | +65 8029 9573 | sawyehtet.com | linkedin.com/in/sawyehtet

SUMMARY

IT diploma graduate with hands-on testing experience from a year supporting a VR simulation system, where I owned testing end to end, ran structured user sessions, and tracked defects through to resolution. I write clean, well-tested code, including over 70 pytest cases on my own open-source tool, and I like catching problems before they reach users.

SKILLS

Testing	: manual and functional testing, test case design, cross-browser and cross-device testing, user acceptance testing
Defect management	: issue reproduction, defect logging and tracking, written test reports
Automation foundations	: pytest, test-driven development
Languages & tools	: Python, SQL, Git
Process	: Agile and SDLC basics
Web	: React, TypeScript (project experience)

EXPERIENCE

Research Assistant & Software Developer

April 2025 – Feb 2026

Centre of Excellence in Maritime Safety, Singapore Polytechnic

- Owned testing end to end for a Unity VR maritime training application across Meta Quest 3 headsets and bHaptics haptic gloves.
- Designed and ran 12 structured user testing sessions, turning the findings into actionable reports for the development team.
- Reproduced and logged around 40 reported issues with clear reproduction steps, tracking them to resolution.
- Checked behaviors across different hardware setups to confirm the application worked consistently.

PROJECTS

Tokey - real-time token cost tracker for Claude Code CLI (Python, open source)

- Shipped to GitHub with over 70 passing pytest cases covering transcript parsing and live-state edge cases, built with test-driven development and a clean, atomic Git history.

sawyehtet.com - personal portfolio

- Built with React 19, TypeScript, and Vite; tested across browsers and devices, deployed on Netlify.

EDUCATION

Diploma in Information Technology

March 2023 – May 2026

Singapore Polytechnic

PROFESSIONAL DEVELOPMENT

Building SQL and automated testing skills through self-study.

Preparing for the Azure Fundamentals (AZ-900) certification.
