

# SAW YE HTET

IT Support & Service Desk

Singapore | sawyehtet.dev@gmail.com | +65 8029 9573 | sawyehtet.com | linkedin.com/in/sawyehtet

## SUMMARY

IT diploma graduate with a year of hands-on technical experience supporting a VR simulation system at a maritime research centre, covering device setup, troubleshooting, user testing, and documentation. I work through technical problems methodically and explain them clearly, and I am building service desk fundamentals through computer networking and IT service management coursework.

## SKILLS

|                                      |                                                                              |
|--------------------------------------|------------------------------------------------------------------------------|
| <b>Support &amp; troubleshooting</b> | : Issue diagnosis, issue reproduction, user support, technical documentation |
| <b>Operating systems</b>             | : Windows (daily use), Linux (command line, basic scripting)                 |
| <b>Networking</b>                    | : TCP/IP, DNS, DHCP fundamentals (Coursera, in progress)                     |
| <b>Service management</b>            | : ITSM and ticketing concepts (ServiceNow coursework, in progress)           |
| <b>Databases</b>                     | : SQL, comfortable writing queries                                           |
| <b>Tools &amp; languages</b>         | : Git, Python                                                                |

## EXPERIENCE

### Research Assistant & Software Developer

April 2025– Feb 2026

*Centre of Excellence in Maritime Safety, Singapore Polytechnic*

- Set up, configured, and troubleshoot a Unity VR training application running on Meta Quest 3 headsets and bHaptics haptic gloves, keeping sessions running smoothly for users.
- Reproduced and documented around 40 issues raised during testing, then tracked them through to resolution with the development team.
- Ran 12 structured user testing sessions and wrote up the feedback as clear, actionable reports.
- Wrote setup and troubleshooting guides so other staff could run the system without help.

## PROJECTS

### Tokey - real-time token cost tracker for Claude Code CLI (Python, open source)

- Shipped to GitHub with over 70 passing tests; built a poll-based reader for live cost tracking and documented the work from spec through to release.

### sawyehtet.com - personal portfolio & Blog page

- Built with React 19, TypeScript, and Vite; deployed on Netlify.

## EDUCATION

### Diploma in Information Technology

March 2023 – May 2026

*Singapore Polytechnic*

## PROFESSIONAL DEVELOPMENT

Coursera: Computer Networking, and IT Service Management with ServiceNow (in progress).

Preparing for the Microsoft 365 Fundamentals (MS-900) certification.
