

SAW YE HTET

IT Support Engineer

sawyehtet.dev@gmail.com · +65 8029 9573 · Singapore · sawyehtet.com · linkedin.com/in/sawyehtet

ABOUT ME

Singapore Polytechnic IT graduate with hands-on experience supporting software and users across multiple hardware setups in a maritime training centre. Troubleshoots methodically, documents each fix, and explains technical issues clearly to non-technical users. Comfortable with SQL and the Linux command line, and quick to pick up new tools and environments. Looking for an IT Support or Service Desk role at a consultancy or larger enterprise.

WORK EXPERIENCE

Research Assistant & Software Developer April 2025 – Feb 2026
Centre of Excellence in Maritime Safety (CEMS)

- Supported instructors and trainees using a Unity VR training application, diagnosing and resolving performance, stability, and device issues to keep sessions running reliably at a consistent 72 FPS
- Set up, tested, and maintained the application across multiple hardware configurations, resolving device-specific issues and documenting configurations for repeatable setup
- Worked directly with non-technical users to understand issues, validate fixes through structured testing, and turn feedback into clear technical actions

EDUCATION

Diploma in Information Technology March 2023 – Feb 2026
Singapore Polytechnic

- CGPA: 3.55 / 4.0
- Certificate in IoT (electives in Python, sensor interfacing, 5G/AIoT)

SKILLS

Technical Support	Systematic troubleshooting, root cause analysis, issue reproduction, technical documentation, end-user support
Communication	Explaining technical issues to non-technical users, stakeholder communication, requirements gathering
Systems & Tools	Linux command line, Git, Postman, VS Code, REST APIs, HTTP debugging
Languages & Data	Python, JavaScript, Bash, SQL (comfortable writing queries)
Hardware	Multi-configuration device setup and troubleshooting (Meta Quest 3, bHaptics peripherals)

PROJECTS

Tokey (Real-time token cost tracker for Claude Code) Python · Open source
github.com/sawyehtet-dev/tokey

- Shipped to GitHub with 73 passing tests covering transcript parsing and live-state edge cases
- Documented design decisions across the full spec-to-release cycle and maintained a clean, atomic Git history

Personal Portfolio & Technical Writing React 19 · TypeScript · Vite
sawyehtet.com

- Designed and deployed a writing-first personal site with a dedicated work section for recruiters
- Validated responsive behavior across browsers and devices, logging clear reproduction steps for each issue found
